## OBJECTIVE

My career goal is to become a part of a development team in a software company as a developer, where I can provide high value in a short amount of time and work with visionary team members to develop software projects.

## SKILLS

Node.js (Express), Angular, PostgreSQL, TypeScript, Rest API, MongoDB, GitLab, TypeORM, Linux, Python, JavaScript, bash, Fluent in Spoken and Written English, Strong Communication Skills.

### SOFTWARE DEVELOPER RENAULT GROUP

MAY 2022 – APR 2023

I developed the back-end of a web-based project with Node.js and the front-end with Angular, which yielded a profit of 450,000 euros for the procurement department at Oyak Renault in 6 month. I used PostgreSQL for the database and managed the project's code through GitLab. As a volunteer, I contributed to the development of the software development team by preparing weekly algorithmic questions to improve the team's skills.

### SOFTWARE TECH. INSTRUCTOR T3 VAKFI

APRIL 2021 – JAN 2022

I prepared and presented a three-month training on algorithms for middle school students. I taught my students lessons on how an algorithm should be and how to solve algorithmic problems.

### SOFTWARE DEVELOPER INTERN ALANYA ALAADDIN KEYKUBAT UNIVERSITY IT
